About This Game

Alien Invasion Tower Defense

Alien Invasion TD is a new strategy 3D game with an exciting new design, campaign mode, endless mode, players custom-built levels and PVP online multiplayer.

The aim is to defend against waves of approaching enemies by placing and upgrading your defense towers, recruiting units and using special attacks and boosts. You will be challenged to reconsider your tactics and use different towers and heroes to complete the mission. Each mission has three levels of difficulty and two special modes with player handicap.

Towers

Building and upgrading towers to attack enemies – each tower with its own unique advantages and upgrades – will enable you to

overpower the waves of enemies.

The following towers are available:

- Tesla Tower - electricity bounce
- Cannon Tower - AOE
- Plasma Tower - freeze effect rate
- Soldier Tower - recruit soldiers

Each tower has nine different types of upgrades and improvements.

Heroes

There are a total of four heroes to unlock, each with its own unique skills which will aid you in different circumstances. At each level you can use up to two heroes. Different heroes are superior at different levels – select the right ones or you will face staggering defeat.

- Willy - fast speed and high damage, he can place mines to stop the alien swarm.
- Kristy - armed with her rocket launcher, she is able to inflict substantial AOE damage and has a special freeze missile.
- Thunder - equipped with a sniper rifle and a jetpack, he has a deadly long-range attack.
- Dave - high health and armor combined with a lethal shotgun and a grenade-launcher to block enemies.

Enemies

The aliens won't show you any mercy so you better watch out! There are 15 unique enemies with different traits which will make you reconsider your tactics at each level. The awesome stuff they can do includes teleporting, speed-boosting, sniping, freezing and destroying towers and more.

Online Multiplayer PVP

The game has a real-time multiplayer mode in which you need to both attack and defend. You earn a special currency throughout the battle which can be used to send more enemies to your opponent when you see a hole in his defense.

-
- Public matchmaking
 - Private games

Custom Level Builder and Browser

The custom level builder allows you to create your very own maps and publish them for all to use! You can browse, preview and play the maps and even leave a review. This lets you enjoy the experience of building and sharing with the community.

- Highly customizable wave-builder
- Three map sizes
- Build your own map with up to three paths
- Create up to 15 waves of enemies
- Designate tower locations and place other props
- Save your progress
- Publish the map

this game was fun until the idiotic freezing effect from certain mobs then it became a clicker and you cant upgrade your towers because you have to click on every tower 4 times to break the ice. also you cant choose targets with your towers decent for the price but annoying mechanics ruin it late in the game.. Its a fun game but I have run into a snag where I cannot move around with my mouse, the game does not scroll in reponse to my mouse movements

It is simple and fun and cheap, sorta like twiddling your thumbs, I highly recommend. It's ok for the price, I guess - although there are better free alternatives....

Multiplayer is also pretty much non-existant (because nobody plays it)

FYI: there are no trading cards (unlike the store page suggests)

and the developer does not seem to read or post anything here on steam. After the first few levels, I thought this might turn out to be a cutsie, easy game - I was wrong!

A lot of thought is needed.

Great bang per buck game.. After the first few levels, I thought this might turn out to be a cutsie, easy game - I was wrong!

It's a really well made tower defence. It starts of easy but don't let that fool you. It becomes hard quickly and you need to think it out. I have not beaten it yet at the time of this review. i highly suggest getting this game.. Easy going tower defense , i like it , good challenge ,but only four towers you can upgrade , four heroes you can choose from, five levels for each map,many foes and bosses.For the price you cant go wrong.. To bad there are not many active players, would love to try out the multiplayer.. It's ok for the price, I guess - although there are better free alternatives....
