Q: \mathbb{S}^n is a subspace of \mathbb{S}^n Let $\mathbb{S}^n = \{ (x_1, x_2, \dots, x_n) \in \mathbb{R}^n : x_j = x_{-j} \text{ for } j = 1, \dots, n \}$. Let \mathbb{S}^n be a real vector space and let n be a natural number. I want to prove that \mathbb{S}^n is a subspace of \mathbb{S}^n . So what I'm trying to do is: $\mathbb{S}^n = \{ (x_1, x_2, \dots, x_n) \in \mathbb{R}^n : \sum_{j=1}^n x_j = \sum_{j=1}^n x_{-j} \}$. It seems that I'm not seeing the "obvious" steps. A: The subspace \mathbb{S}^n of \mathbb{S}^n is equal to $\mathbb{S}^n = \{ (x_1, x_2, \dots, x_n) \in \mathbb{R}^n : x_1 + \dots + x_n = 0 \}$. \mathbb{S}^n Platinum & Gold Diamond Pendant \$79.99 A mix of iridescent green diamonds and platinum nestled among 12 round brilliant cut diamonds in a lustrous platinum setting will make you want to put the word gorgeous in the title of your next project. The high polish iridescent diamonds will catch the light and sparkle with you throughout 82157476af
